

South Bay Salt Ponds Initial Stewardship Plan

Draft Environmental Impact Report/Environmental Impact Statement

Technical Appendices

December 2003

California Department of
Fish and Game

Submitted by:

United States Fish and
Wildlife Service

List of Technical Appendices

Appendix	Title
A	South Bay Salt Ponds—Initial Stewardship Plan
B	Assessment of Impact to Aquatic Life Associated with Circulation of Saline Pond Water During the Initial Stewardship Period
C	Evaluation of the Potential for Reductions in Dissolved Oxygen Associated with Circulation of Saline Pond Water During the Initial Stewardship Period
D	Evaluation of the Potential for Impacts to Aquatic Life Due to the Presence of Heavy Metals in the Saline Pond Water Circulated During the Initial Stewardship Period
E	Evaluation of the Potential for Impacts to Aquatic Life Due to the Elevated Salinity of Pond Water Circulated During the Initial Stewardship Period
F	Evaluation of the Potential for Impacts on Salmonid Migration Associated with Circulation of Saline Pond Water During the Initial Stewardship Period
G	Evaluation of the Potential for Salinity Impacts on Bay Shrimp Associated with Circulation of Saline Pond Water During the Initial Stewardship Period
H	Native American Contacts
I	Additional Sediment Sampling and Analysis Plan
J	Selected Tables and Figures from PRBO Report to California Coastal Conservancy
K	Alviso Island Pond Breach Initial Stewardship Plan Study
L	Species Composition of Fish, Shrimp, and Crabs Collected by the California Department of Fish and Game Fishery Surveys from South Bay
