

**SOUTH BAY SALT POND RESTORATION PROJECT
DRAFT SCIENCE PLAN
October 1, 2004**

Prepared by Lynne Trulio, Lead Scientist,
South Bay Salt Pond Restoration Project

And Science Synthesis Leads:
Josh Collins, Jay Davis, Michael Josselyn,
David Schoellhamer, Dilip Trivedi, Nils Warnock

And Science Synthesis Contributors:
John Callaway, Neil Ganju, Ed Gross, Jessica Lacy
Megan Lionberger, Mark Marvin-DiPasquale, Fred Nichols
Kate Shafer, Greg Shellenbarger, Mark Stacey
Cheryl Strong, John Takekawa
San Francisco Estuary Institute Staff
Wetland Research Associates Staff

**SOUTH BAY SALT POND RESTORATION PROJECT
DRAFT SCIENCE PLAN
October 1, 2004**

Table of Contents

I. Introduction	1 - 2
II. Providing a Scientific Analysis of the Project Objectives.....	2 - 3
III. Identifying Broad Science Questions and Key Science Issues.....	3 - 6
IV. Preparing Science Syntheses.....	7 - 14
o Introduction	
o Importance of Each Key Issue to the Project Objectives	
V. Identifying Preferred Performance Standards and Measures for Restoration Progress.....	14 - 17
VI. Assessing Our Predictive Abilities.....	18 - 22
VII. Identifying Key Uncertainties.....	22 - 25
VIII. Making Science-based Recommendations for Planning, Design and Implementation.....	26 - 29
IX. Instituting a Science Structure.....	30 - 33
o Science Structure to Address Science Needs	
o Opportunities for Applied Studies	
o Peer Review	
X. Integrating Science into the Project.....	33 - 38
o Science Structure and Project Management Team Integration	
o Science Team and Consultant Team Integration	
o Budget Estimates for Science Support	
Figures.....	39 - 41
Appendix 1—Science Synthesis Authors.....	42
Appendix 2—Draft Summaries of Science Syntheses by Key Science Issue.....	43 - 97
