** EXACT DATE UNKNOWN

INTRODUCTION

This is an index of National Ocean Service (NOS) tide station locations stored in the Tides Automated Login and Retrieval System (TALARS).

Please be aware of the following limitations of this index:

1. Stations with ** in the installed and removed data columns:
 - a. Usually these dates are not available and in the TALARS system yet.
 - b. A few of these stations (with blank published date column) are currently proposed or were proposed but never installed and have not been eliminated from the data base yet.
2. Stations with a blank removed date are presently operating.
3. Stations with more than one installed and removed date have been reoccupied.
4. Installation and removal dates indicate the time period that data was collected, however, there may be breaks in the data and some data may not be acceptable by NOS standards.
5. Some unpublished historic station sites have not yet been assigned a station ID number and are not listed.
6. This index will be updated periodically.

The data typically available for these station may include:

1. Time and heights of high and low waters
2. Hourly heights
3. 6-minute heights
4. Various data summary information
5. Tidal Datums with Bench Mark sheets
6. Times Series Plots
7. Harmonic Analyses
8. Tidal Predictions

For more information on these products, please refer to the NOS Products and Services Handbook or write to:
